

14. Construct a C program to organize the file using single level directory.

Code:

```
1
2 #include <stdio.h>
3 #include <string.h>
4
5 int main() {
6     int n;
7     char file[20][20];
8
9     printf("Enter number of files: ");
10    scanf("%d",&n);
11
12    for(int i=0;i<n;i++) {
13        printf("Enter file %d name: ",i+1);
14        scanf("%s",file[i]);
15    }
16
17    printf("\nFiles in Single Level Directory:\n");
18
19    for(int i=0;i<n;i++)
20        printf("%s\n",file[i]);
21
22    return 0;
23 }
```

Output:

```
Output
Enter number of files: 2
Enter file 1 name: a.text
Enter file 2 name: b.text

Files in Single Level Directory:
a.text
b.text

=== Code Execution Successful ===
```
