31. FIFO Page Replacement

Code:

```
#include <stdio.h>

int main() {    int pages[20],
frames[10];    int n, f, pos =
0, faults = 0;

    printf("Enter number of pages: ");
    scanf("%d", &n);

    printf("Enter page reference string:\n");
    for(int i = 0; i < n; i++)        scanf("%d",
&pages[i]);

    printf("Enter number of frames: ");
    scanf("%d", &f);

    for(int i = 0; i < f; i++)
frames[i] = -1;

    for(int i = 0; i < n; i++)
    {        int found
= 0;

        for(int j = 0; j < f; j++)            if(frames[j]
== pages[i])                found = 1;

        if(!found)
        {
            frames[pos] = pages[i];
pos = (pos + 1) % f;
faults++;
        }
    }

    printf("Page Faults = %d\n", faults);
```

```
return 0;
```

```
} Output:
```

A screenshot of a terminal window with a black background and white text. The window has a title bar with standard icons (minimize, maximize, close, settings, and a file icon). The text inside the terminal shows the program's execution: it prompts for the number of pages (8), the page reference string (1 2 3 4 4 3 2 1), and the number of frames (3), then outputs the number of page faults (5). At the bottom, it shows the program finished with exit code 0 and prompts the user to press ENTER to exit the console.

```
Enter number of pages: 8
Enter page reference string:
1 2 3 4 4 3 2 1
Enter number of frames: 3
Page Faults = 5

...Program finished with exit code 0
Press ENTER to exit console.
```
